
Look who's talking about Moving Forward Rehabilitation

AT COMMUNITY NURSING & REHABILITATION CENTER

Richard Gamble was in a serious car accident and stayed in a coma for two weeks at Eskenazi Hospital. He suffered a traumatic brain injury that left him with no memory of the accident or who he was.

He continued to recuperate at **Community Nursing and Rehabilitation,** where he worked hard in physical, occupational and speech therapy. "The therapists made therapy fun for me," he said.

He became especially fond of his nurse, Mary, who has served residents of **Community Nursing and Rehabilitation** for over 20 years. "She is a sweetheart and would do anything in the world for me. She keeps a positive outlook and it rubs off on everyone," he said.

Community Nursing and Rehabilitation staff is now helping him plan for a move to an assisted living community. "I have come a long way since I came here to **Community Nursing and Rehab.**"

Mr. Gamble said he is excited about being back on his own.

Moving Forward program is designed for those striving to restore abilities lost due to stroke, cardiovascular difficulties, orthopedic surgery and other debilitating conditions. Programs vary in frequency and intensity and include physical, occupational and speech/language therapies. Our goal is to return our participants home safely with the skills they need to continue life on their own terms.
