Clark Rehabilitation and Skilled Nursing Center Receives Deficiency-Free State Inspection

CLARKSVILLE IN — Clark Rehabilitation and Skilled Nursing Center was found to have no deficiencies during a recent inspection by the Indiana State Department of Health.

Operated by American Senior Communities at 517 North Little League Blvd., the community serves seniors and others who need rehabilitation, memory care and skilled nursing. The health department inspects such communities to assess compliance with state standards of care, such as adequacy of staffing, quality of care and cleanliness of facility.

A deficiency-free score is the best score a senior health facility can receive and is a distinction achieved by a low percentage of senior health facilities.

Compassion, attentiveness, relationships and excellence are the core values for Clark Rehabilitation and Skilled Nursing Center and all American Senior Communities locations, said ASC officials.

"We are so proud of and grateful to our team at Clark Rehabilitation and Skilled Nursing Center for living out these values in an exceptional way," said David Stordy, ASC's chief operating officer. "Without this team's high level of dedication and commitment, a deficiency-free survey would not be possible."

Clark Rehabilitation and Skilled Nursing Center offers Moving Forward Rehabilitation, Hospice, Respite, Skilled and Long-Term Care.
